#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

PLANET EARTH
Testbook - "Earth: Portrait of a Planet" (by Stephen Marshak)
REVIEW SHEET FOR TEST #1
Numbered items refer to vocabulary

Energy Resources Chapter 14

1. Anthracite - when bituminous coal is put at very high temperatures (200-300 degrees C) and transforms into shiny black, anthracite coal (also called hard coal)
2. Bituminous - when lignite is put at high (100 - 200 degrees C) and it becomes dull and black bituminous coal
3. Hydrocarbon generation - the process that if black shale cracks in the oil window, the organic material within transforms into kerosene and then into oil and gas
4. Hydrocarbon reserve - a known supply of oil and gas held underground
5. Hydrocarbon - oil and natural gas consist of hydrocarbons, chainlike or ring like molecules made of carbon and hydrogen atoms
6. Lignite - with increasing burial, peat transforms into a soft dark - brown coal called lignite
7. Oil age - what bituminous in the future may refer to our time as, because so much of our economy depends on oil.
8. Oil shale - shale containing kerogen
9. Oil window - oil itself forms only in a relatively narrow range of temperatures called the oil window
10. Peat - compaction and partial decay of the vegetation transforms it into peat, peat contains about 50% carbon, and itself serves as a fuel in many parts of the world

11. Petroleum - a mixture of hydrocarbons that is found in the earth's crust and is used as a fuel and as a raw material for many products
