## What is **stylistics**?

**Stylistics** is the description and analysis of the **variability of linguistic forms in actual language use**.

The concepts of '**style**' and '**stylistic variation**' in language rest on the general assumption that within the **language system**, the same content can be encoded in more than one linguistic form. Operating at all **linguistic levels** (e.g. lexicology, syntax, text linguistics, and intonation), **stylisticians** analyze both the **style of specific texts** and **stylistic variation across texts**.
