

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Chapter 2

1.

- In this particular insurance market, one would not expect asymmetric information to be much of a problem – the probability of a hurricane is common knowledge. Moral hazard could be an issue – people are more likely to build near a beach if they have hurricane insurance. Still, one would expect the market for hurricane insurance to operate fairly efficiently.
- There is substantial asymmetric information in the markets for medical insurance for consumers and also malpractice insurance for physicians. For efficient consumption, the price must be equal to the marginal cost, and the effect of insurance may be to reduce the perceived price of medical care consumption. That would lead to consumption above the efficient level. Because of the roles of regulation, insurance, taxes, and the shifting of costs from the uninsured to the insured, there is little reason to expect the market to be efficient.
- In the stock market, there is good information and thousands of buyers and sellers. We expect, in general, efficient outcomes.
- From a national standpoint, there is a good deal of competition and information with regards to MP3 players and music. The outcome will likely be efficient for MP3 players and music. However, some firms might exercise some market power through high brand awareness and proprietary downloading systems.
