

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Solving Word Problems Involving Solutions of Quadratic Functions

A soccer player kicks a ball with an initial velocity of 32 feet per second from a starting height of 0 feet. Use the vertical motion model, $h = -16t^2 + vt + s$, where v is the initial velocity in feet/second and s is the height in feet to calculate how long the ball will be in the air. $a = -16$ $b = 32$

$$h = -16t^2 + 32t + 0$$

$$t = \frac{-b}{2a} = \frac{-32}{-32} = 1$$

$$h = -16(1^2) + 32(1)$$
